A MESSAGE from DIBBLE'S

DEAR PLANTER:

Some time ago we mailed you our 1939 Catalog describing Dibble's Seeds for this season, telling how this business, which originated on a farm and not at a city desk, had, for nearly half a century, furnished customers in our district (which, as we figure it, covers a radius of 300 miles) with the very best of farm seeds.

We set a 300-mile radius because we felt that freight or express charges to points farther than 300 miles away would make the cost of our seeds prohibitive, but we do have a good many customer friends living beyond the 300-mile zone who are willing to pay transportation charges on the long haul in order to get seed they know they can depend upon.

This folder is a reminder that planting-time is getting nearer, and to quote today's prices so you can get out the Catalog and make up your order.

We want to call your attention to the fact that the officers of this Company own their own farms, and that, as far as possible, our seeds are raised on the Dibble and Martin farms of over 1000 acres.

The seeds we do have to buy must meet the standards set on our own farms, so that we have no hesitancy in placing the famous Dibble guarantee squarely behind every seed that leaves our place.

Everything we have to sell is carefully described in our Catalog, and a few specialties are again mentioned in this folder, things so good we do not want you to miss them.

Get your orders in as early as possible and avoid disappointment, because we do sell out on many items as the season advances.

EDWARD F. DIBBLE SEEDGROWER

Dibble's DOUBLE CROSS HYBRID 29-3 CORN

This picture shows a representative sample of ears of this wonderful Corn from our own farms.

It matures in 110 to 115 days, with ears 9 to 10 inches long and 2 inches in diameter. A yellow Corn with a reddish tinge and showing deep amber between the rows. It produces 40 to 50 per cent more grain at silage-cutting time and 15 to 20 more bushels of dry shelled Corn per acre at husking-time.

EDWARD F. DIBBLE SEEDGROWER • Honeoye Falls, N. Y.

OUR GUARANTEE

There is just one reason why we can afford to make the guarantee we do and allow you to be both judge and jury, and that is because our seeds are that kind. Dibble's famous "money-back-if-you-want-it" guarantee, subject to any test you want to make within ten days after the seeds reach you, is as fair and square as any ever given by an American firm. And our special guarantee or warranty is printed on the respective pages describing our seeds, and our various seeds are sold subject to the guarantee so printed. We are perfectly reliable and responsible. We refer you to the State Bank of Honeoye Falls, N. Y., Lincoln Alliance Bank and Trust Co., Rochester, N. Y., Dun & Bradstreet, Inc., Commercial Agency, or to any of our thousands of satisfied customers, some of whom must be in your vicinity.

Sincerely Yours,

EDWARD F. DIBBLE SEEDGROWER

Dibble's OATS

It was the wonderful productivity of Dibble's Oats that started Mr. Dibble in the seed business back in 1891, and in all these years there has never been a let-down.

We pride ourselves on our superior strains of this important cereal, strains that produce, year after year, excellent crops of clean, heavy grain.

Whether you grow Heavyweight or Twentieth Century, we know you are going to be pleased.

Dibble's SEED POTATOES

With four-fifths of our business from old customers, and with our Catalog and satisfied customers as our only salesmen, we say, with pardonable pride, that Dibble's Seed Potatoes are the kind that produce profitable crops.

We can furnish State-Certified Seed or those grown from Certified Seed.

ONE PINT	$1.00
(Enough for two bushels of seed corn)	
ONE-HALF PINT	$ .60
(Enough for one bushel of seed corn)	

The Plain Truth About The 1939 Farm Seed Situation

There appears to be ample stocks of clover seed, sweet clover, timothy, and most of the other grasses for this year's sowing. Prices on these items are low and you can again use your normal requirements.

The exception is found in hardy northern grown alfalfa. The northern crop was very small and in some sections almost a failure. Do not be misled by low prices for seed from warmer climates. Our alfalfa is all from Northern Idaho, Montana, or Canada.

Good stocks of high germinating seed corn will be available. Much interest is being shown in Hybrid seed corn and more will be planted than ever before.

Seed oats of good quality are not plentiful.

The crop reporting board at Washington estimated the merchantable potato stocks on hand January 1, 1939 available for sale in the 37 late and intermediate states at 100,806,000 bushels. This total was 11% smaller than stocks on hand Jan. 1, 1938 and 4% smaller than the 5 year (1933-37) average. Seed stocks of potatoes are much smaller this year. The demand for seed will be greater this year as many farmers find themselves short of planting stock due to the poor quality that was harvested in many sections. Good seed potatoes will command a higher premium over table stock than usual and several varieties will be cleaned up early in the season.
